

Our Vineyards

It starts with the land. HALL's estate vineyards stretch from ancient riverbeds on the valley floor to sun-drenched hilltops, encompassing more than five hundred acres of classic Bordeaux varietals: Cabernet Sauvignon, Merlot, and Sauvignon Blanc. As winegrowers, we manage each vineyard ourselves, block by block, always with the finished wines in mind. Our meticulous attention to detail, strong respect for the environment and cutting-edge vineyard technology yield the highest quality grapes and enable our wines to express the unique and diverse character of Napa Valley's soils and climate.

Don Munk, Director of Vineyard Operations

Don Munk, Director of Vineyard Operations, provides a lifetime of knowledge and experience to HALL Winery. Having grown up in the wine industry, born and raised in the Napa Valley, Don began working in the vineyards of a family friend at age the age of 15 and has been farming ever since. Don holds a Bachelor's degree in Agriculture Business Farm Management from California State University, in which his studies strongly focused on viticulture. Don's professional experience began at Buena Tierra Vineyards, where he worked as a Harvest Assistant and Grafter for 6 years. From there he became the Equipment Manager and Vineyard Assistant at several vineyards where he participated in vineyard development, field monitoring, soil sampling, equipment operations as well as pruning, tying, suckering, grafting, and shop maintenance. Don then took his skills to Foster's Wine Estates in St. Helena, CA in 1990. There he took on the role of Vineyard Manager where he was responsible for the operations of 725 acres. Now, Don is committed to carrying on the HALL's dedication to the environment and eco-friendly farming while ensuring the production of the finest wines possible.

"I strongly believe you must be environmentally sustainable with your farming and you need to be responsible to your community. We can never forget that Napa Valley is truly one of the premiere winegrowing regions in the world and we should farm it with reverence: Farm to the vineyard and farm to the vine. Let the vine tell you what it can do. Create a healthy, balanced scenario for the vine so that it can express itself as it should."
