In our pursuit to craft the finest Bordeaux varietals possible, each HALL estate vineyard was strategically chosen for its elevation, micro-climates, and soil type. Our viticulture team manages each vineyard block by block, adjusting their small-vine practices according to varietal, terroir, clone, rootstock, and row orientation. We farm for quality rather than yield and employ organic practices to ensure vineyard health and optimum fruit character.

Map and vineyard statistics current March 2008. For more information, visit www.hallwines.com.
